6 If we say that we have fellowship with him, and walk in darkness, we lie, and do not the truth:

7 But if we walk in the light, as he is in the light, we have fellowship one with another, and the blood of Jesus Christ his Son cleanseth us from all sin.

Light waves. Fields of energy.

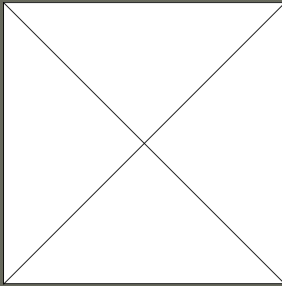

Light waves also come in many frequencies. The **frequency** is the number of waves that pass a point in space during any time interval, usually one second. It is measured in units of cycles (waves) per second, or Hertz (Hz). The frequency of **visible light** is referred to as **color**, and ranges from 430 trillion Hz, seen as red, to 750 trillion Hz, seen as violet. Again, the full range of frequencies extends beyond the visible spectrum, from less than one billion Hz, as in radio waves, to greater than 3 billion billion Hz, as in gamma rays.

Light waves, as fields of energy

The amount of energy in a light wave is proportionally related to its frequency:

High frequency light has high energy;

low frequency light has low energy.

Thus gamma rays have the most energy, and radio waves have the least.

Of visible light, **violet** has the most energy and **red** the least.
